

Letter From Diana Nightingale

I want to share some good news with you.

For the past several years I have experienced declining health (that's not the "good news" that comes later) - - a situation almost intolerable for a high-speed, high-energy person. I knew from the time I was in my forties that I have mitral valve prolapse, but was told, "that'll never kill ya!" But in recent years, I went from an occasional missed heartbeat, to full blown atrial fib and spiking blood pressure, and knew that this was something that could "kill ya!" Blood clots could form, a stroke could ensue.

Living alone, I took lots of notes and put important information in little books that I left around the house so my kids would know what to do, if one day, I wasn't here anymore. It was frightening to me and I'd have horrible anxiety attacks that accompanied my atrial fib. I prayed a lot and accepted my fate - - whatever that might be.

To add to my physical discomfort, I was plagued by legal issues surrounding Earl's work, and because I have always operated from a secure position of what my legal rights are, this only added enormous stress to my heart problems.

Then last May, I went to visit my daughter, Jill and her family in California, and stayed the summer until fall. One evening I was at the restaurant she and her husband owned, when a couple of men came in to eat. We engaged in conversation and I learned that one of the men had had many of the similar health issues that I had - - the difference was - - he didn't have them anymore. I learned that these two gentlemen were taking a liquid arginine product, which has been proven to reverse - - yes, reverse heart disease! I immediately began doing extensive research on the product, and bought my first bottle of the product.

This incredible product contains some of the most highly proven ingredients available, which work together to reverse heart disease, and has been used by Dr. Joe Prendergast, world renowned Endocrinologist, also known as The Uncommon Doctor, in his practice dedicated to diabetics.

To add to the credibility, I learned that in 1998, three doctors, Dr. Robert F. Furchgott, Louis J. Ignarro, and Dr. Ferid Murad, won the Nobel Prize in Medicine "For their discovery concerning nitric oxide as a signaling molecule in the cardiovascular system. This liquid product contains L-Arginine which converts to nitric oxide.

Well, here's the good news! Within four months, I no longer have atrial fib; my blood pressure has returned to my normal - - very low and I have no anxiety attacks. In addition, my food allergies and acid reflux have disappeared. Other

typical, aging annoyances have also gone - - I don't creek when I go upstairs, and I don't get breathless walking long distances, or going up stairs. In short - - I feel great and I attribute it all to this amazing formula.

Of course, after learning about and using this remarkable product, I immediately wanted everyone I knew to try it. A few of my girlfriends bought it just to shut me up - - but a month later, needed to know how they could order more, because it made such a difference in their lives.

My son, Dayne, went through chemo therapy for cancer last year and takes this arginine product every morning. His energy level is incredibly high, his attitude is positive and he feels just great!!

If, I were a rich woman, I would buy liquid arginine by the case and send everyone I know a bottle to try. Unfortunately, I can't do that, but I'm doing the next best thing by telling you about it. I believe it saved my life - - pure and simple.

So, that's the good news and the blessing that has been added to my life this year. I hope you find value in this information.

God bless you, always,

Diana Nightingale
